Quality

- French oak thickness 27/30 mm (1.06- 1.18 in)
- Natural air drying visible on our production site
- Open oak fire bending
- True and guaranteed tightness before delivery
- Recyclable individual packing

Hooping

- 8 galvanized stainless steel hoops

Hooping modifications available on request.

Kosher Barrels

All of our barrels can be customized to meet kosher standards. Barrels labeled "Kosher" are produced in the same way as are our other barrels, albeit with some modifications that respect the rituals of Judaism.

Arrangements can be made to have a Rabbi on premise at the cooperage during the period of construction to ensure that all the regulations are adhered to in the manufacturing process.

For example, we use a kosher paste that replaces the usual flour paste for croze (heads) sealing. This product is blessed and recognized by an Italian Rabbi working with the manufacturer.
